Create a new Instagram account in your Accounts Centre?

This will help you easily access features that work across our products.

We'll combine your info across accounts in this Accounts Centre. Here's what we'll use it for:

- We'll provide you with controls over connected experiences
- We'll personalise ads for you and others and measure how they perform
- We'll personalise content and suggestions for you and others
- We'll adjust some account info and settings to match across accounts, which you can manage at any time
- We'll suggest friends and accounts to follow
- We'll improve our products and provide optional activities that span across them

You can remove accounts from the same Accounts Centre at any time in Settings. We'll stop combining your info across these accounts for the above uses within 15 days after you've removed them. Your previously combined info would remain combined.

Learn more about this and other ways that we use your info across accounts.
